Re: B.P. Minerals
Barney's Canyon Project
Truck Shop Truck Wash

Dear Mr. Ramsey:

We have reviewed the proposal for the truck wash at the Barney's Canyon project truck shop.

Based on our review, the following comments must be addressed before an approval can be issued:

- a. If automotive and mobile mining equipment were to be washed during the winter, then the provisions to insure operation in freezing conditions must be detailed.
- b. Disposal of water from the holding pond during freezing weather conditions must be clarified.
- c. Description and design detail to insure that the pumps in the holding pond will not pump to a level where oil and grease may be drawn into the water truck must be provided.
- d. Disposal of sediments washed from the automotive and mobile mining equipment must be described.

We will continue our review of the truck wash as a zero discharging facility upon receipt of further information.

Please contact us if there are any questions.

Sincerely,

Charles G. Dietz, P.E.
